Depok, Jawa Barat, Indonesia

Dedicated, analytical, and highly responsible L2 Application Support Engineer with over 4 years of hands-on experience ensuring the high availability, performance, and stability of enterprise-level B2C platforms. Proven expertise in proactive application health monitoring, error log analysis, rapid troubleshooting, and maintaining stringent service levels. Backed by a strong foundation in Full-Stack Web Development (Node.js, Express.js, Laravel), enabling deep technical investigations, effective root-cause analysis, and seamless cross-functional collaboration with L3 and development teams. Highly communicative and disciplined, with a track record of driving system reliability and optimizing operational workflows through comprehensive SOP documentation.

Work Experiences

PT. Sigma Cipta Caraka (Telkomsigma) - **Jakarta, Indonesia (Hybrid)** Aug 2022 - Present

L2 Application Support (Contract)

Responsible for maintaining the performance and stability of Telkom Indonesia's B2C digital services within the TEID Division, including Digital Smart Care, Antreaja, Knowledge Management System, and FMC Indihome.

- Application Health Monitoring : Oversee critical performance metrics (Transaction Success Rate, Response Time) and infrastructure utilization (AWS ECS, EC2, ALB, Container CPU/Memory) using Splunk and Datadog to ensure optimal uptime.
- Troubleshooting & Issue Resolution : Rapidly identify and resolve application-level issues. Conduct deep-dive error log analysis to determine root causes and implement effective, long-term technical solutions.
- Deployment & Release Support : Collaborate cross-functionally during deployment processes to ensure system stability, accuracy, and compliance with internal standards.
- SOP Documentation : Create and maintain Standard Operating Procedures (SOPs) to empower the L1 support team in independently handling recurring issues.
- Migration : Served as Standby Support during the B2C Digital Smart Care migration. Ensured smooth execution by monitoring application performance, providing technical assistance, and resolving post-migration issues.

PT. Nurul Fikri Cipta Inovasi - **Jakarta, Indonesia** Feb 2025 - Jun 2025

Mobile App Developer (Independent Study - MBKM)

- Key Project: Designed and developed an Integrated Attendance and Automated Tuition (SPP) Payment Information System.
- System Automation & Modernization: Engineered a digital solution to replace manual attendance tracking and tuition billing, significantly reducing administrative errors and processing time.
- Feature Implementation: Developed digital attendance workflows utilizing QR codes for highly accurate data recording and tracking.
- API & Third-Party Integration: Successfully integrated a WhatsApp Bot to provide real-time, transparent notifications to parents, alongside a Payment Gateway to diversify payment methods and ensure secure, trackable transactions.

PT. Invensi Digital Nusantara - **Jakarta, Indonesia (On-site)** Sep 2024 - Apr 2025

Full-Stack Developer (Internship)

- Key Project - BPOM Command Center (bcc.pom.go.id): Acted as the core Full Stack Developer to architect and build the official command center platform.
- Key Project - Asrot (asrot.pom.go.id): Engineered data analytics features and developed system workflow improvements to enhance tracking and reporting capabilities.
- Web Application Development: Built responsive and highly efficient web applications using Laravel and CodeIgniter frameworks.
- Database Management: Designed optimal database schemas and optimized MySQL queries to significantly reduce load times and enhance application performance.
- Technical Documentation & Version Control: Authored comprehensive technical documentation (application flows, ERDs) to streamline user onboarding. Managed team collaboration using GitHub Desktop and GitLab.

PT. Vnue - **Jakarta, Indonesia** Aug 2022 - Oct 2022

Data Analysis Intern

- Analyzed data on people entering and leaving specific locations using Python to generate materials for foreign map creation.

RnD - **Depok, Indonesia** Feb 2022 - Oct 2022

Backend Developer Intern

- Created robust backend structures for a mobile application managing alumni data for SMKS Informatika Utama, as well as a mobile donation application for a foundation.

PT. Hijau Solusi Utama - **Depok, Indonesia** Jun 2021 - Aug 2021

Full-Stack Web Developer Intern

- Developed the BKK Alumni website for SMKS Informatika Utama utilizing the Laravel Framework and MySQL database. Provided complete technical documentation for the website.

Education Level

Sekolah Tinggi Teknologi Terpadu Nurul Fikri - **Depok, Indonesia** Sep 2022 - Sep 2026 (Expected)

Bachelor of Informatics Engineering, 3.68/4.00

- Final Project (Grade A / 92.10): Design and Development of a REST API-Based Educational Management Information Systemin POS PAUD Melati Azzahra Using the Express.js Framework

Technical Skills

- L2 Support & Operations: Application Health Monitoring, Error Log Analysis, Troubleshooting, Deployment/ Release Support, SLA Management.
- Monitoring & Cloud Tools: Splunk, Datadog, AWS (EC2, ECS, Application Load Balancer), Jenkins, Linux (CLI), Postman.
- Software Development: Node.js, Express.js, PHP, Laravel, JavaScript, Python, Mobile App Development.
- Databases: MySQL, MongoDB, PostgreSQL.
- Core Competencies: Problem Solving, System Automation, API Integration, Team Collaboration, Time Management.
