PORTFOLIO / 2026

Ahmad Manarul Baehaqi.

Software Engineer × Application Support

Building digital experiences, keeping systems reliable.

Full-Stack Development
Backend Engineering
L2 Application Support
Monitoring & Reliability

I build reliable applications, investigate technical issues, improve system performance, and create digital solutions that make an impact.

ahmadmanarulbaehaqi@gmail.com

01 / PROFILE

Building, maintaining, improving.

BUILD

Developing web applications, backend systems, and API integrations.

MAINTAIN

Monitoring applications, analyzing logs, and troubleshooting production issues.

IMPROVE

Investigating root causes and improving system reliability.

Education

Sekolah Tinggi Teknologi Terpadu Nurul Fikri
Bachelor of Informatics Engineering
GPA 3.68 / 4.00

Toolkit

Development

Node.js · Express.js · Laravel · PHP · JavaScript · Python

Database

MySQL · MongoDB · PostgreSQL

Cloud & Monitoring

AWS EC2 · AWS ECS · AWS ALB · Splunk · Datadog · Jenkins · Linux CLI

Tools & Workflow

Git · GitLab · Postman · API Integration

02 / EXPERIENCE

Keeping systems reliable.

L2 Application Support (Contract)

PT. Sigma Cipta Caraka (Telkomsigma) · August 2022 – Present

Maintain performance and stability of enterprise B2C digital services. Monitor Transaction Success Rate, Response Time, AWS ECS, EC2, ALB, CPU, and Memory. Perform troubleshooting, error log analysis, RCA, and deployment/release support.

Full-Stack Developer (Internship)

PT. Invensi Digital Nusantara · September 2024 – April 2025

BPOM Command Center and ASROT. Laravel, CodeIgniter, MySQL, database optimization, technical documentation, application development, and Git workflow.

Mobile App Developer (Independent Study – MBKM)

PT. Nurul Fikri Cipta Inovasi · February 2025 – June 2025

Integrated Attendance and Automated SPP Payment Information System with QR code attendance, WhatsApp Bot notifications, and Payment Gateway integration.

Data Analysis Intern

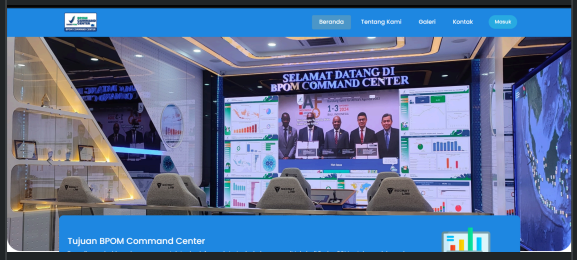

PT. Vnue · August 2022 – October 2022
Location entry/exit analysis using Python.

Backend Developer Intern

RnD · February 2022 – October 2022
Alumni and foundation donation mobile application backends.

03 / SELECTED WORK

Projects with purpose.

BPOM Command Center

Web-based command center project.

Laravel · CodeIgniter

ASROT – BPOM

Application development project for BPOM.

Laravel · MySQL

Educational Management Information System

REST API-based system for POS PAUD Melati Azzahra.

Node.js · Express.js · REST API

Final project grade: A / 92.10

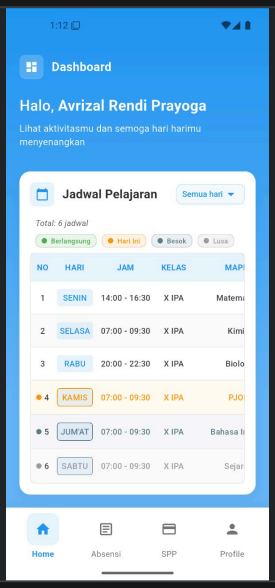

BKK Alumni Website

Web platform for BKK alumni information and management.

Laravel · MySQL

04 / MOBILE PROJECT

Attendance & SPP Payment.

Integrated Attendance & Automated SPP Payment System

An integrated mobile system for attendance and school payment information.

QR Code Attendance | WhatsApp Bot | Payment Gateway

Responsibilities

Implementing QR code attendance and integrating WhatsApp Bot notifications and Payment Gateway.

Application Support

Monitoring

Application health, AWS infrastructure, transaction success rate, response time, CPU, and memory.

Reliability

Error log analysis, troubleshooting, root cause analysis, deployment and release support, and SLA management.

05 / CONTACT

Let's build something meaningful.

Have a project in mind? I'd love to discuss reliable digital products, backend systems, and application support.
